Breezelets

During the present session the provincial government brings in an "act dealing with the purchase and sale of eggs."

But mother hen is still the premier boss of the producing department, and withstands any government cackling with her (woman) rights.

A plant is to be put in at Calgary for the manufacture of cream separators.

There's a fortune awaiting the genius who invents a water separator.

"Much good time wasted by legislature in rambling speeches" is the heading of an article.

Yes. But don't you see, that is the only way some M.P.'s can earn their sessional allowance.

James Marr, of the Calgary board of health, is opposed to wading pools for the kiddies.

First thing we know, Marr will be Mar-ling the kiddies' pleasure in making "mud pies."

"Shall we sink back into luxury and money-making?" asked a public speaker in Calgary, the other day.

That all depends. At the present time there are many who are "sinking" for the want of a little hard cash, and to many a bit a luxury would be real luxury.

"A gallon of water weighs 10 lbs." says an authority.

But a gallon of whiskey is a "dead weight" to the fellow who consumes that amount.

"Bolsheviks dominating Hungary," says a news item.

It is said that where Bolsheviks reign, the people are going hungry and starving.

"Apple shortage sends the price soaring to sky," says a market report.

"Price" has taken an airplane trip while the wholesalers have unloaded their stock.

The Grain Growers of Winnipeg are contemplating of buying up daily papers.

If they do—then their REAL trouble begins—for the printer's devil will be working overtime on the job.

Farmers' Organization

To the Editor Chinook Advance Sir—Kindly permit me through the columns of your paper to draw the attention of your farmer readers to the above subject.

Two things have impressed me very deeply since my return to Chinook. First, the great strides made by the Canadian farmer in organizing to work out his own salvation, economically and politically. It was certainly bracing to realize that they have even gone the length of drafting a good, morally sound political platform; second, that though this wave of progress has swept the country from Atlantic to Pacific, the district surrounding our own little burg (Collholme excepted) is still minus a branch of the U.F.A. In conversation with a number of my farmer friends, I find there is a feeling that this is not just what it should be, consequently I esteem it a duty to ask all who feel interested to meet in the school-house, Chinook, at 2.30 p.m. on Saturday, April 13th, when opportunity will be given to all to express their views on this vital question.

JAMES P. WATSON

A MILD FORM OF FLU

A somewhat milder form of epidemic influenza is going the rounds. Following so closely after the late fatal Spanish flu, it has given the public somewhat a scare. Indeed, in some places it has proven almost as bad as the real thing of a few months ago. The late Spanish influenza epidemic has made the public more cautious, which is a good and a necessary thing.

SURPRISED

Saturday evening, March 25th, a surprise party of fifteen was given at the home of Mrs. B. Dobson, in honor of her son, Fred, before his departure for Denver, Col. A very pleasant evening was spent in games and music. During the evening a very dainty lunch was served. Before returning to their homes the young people encircled the guest of the evening and sang "Auld Lang Syne" and "He's a jolly good fellow."

SORRY TO LOSE THEM

Mr. and Mrs. G. T. Oxley have decided to locate at Innisfail, where Mr. Oxley has purchased a business. Mrs. Oxley leaves here next week for Innisfail. We are sorry to lose two such excellent citizens from Chinook, where they have been active workers for the Red Cross and for all that meant for the best interests of the village. While we wish them every happiness and prosperity in their new home, we hope some time to welcome them again as citizens of Chinook.

The Social Circle

The social circle was held Mar 14th at Mrs. Fred Maris' house, the host and hostess being Mr. and Mrs. Tom Sandman. A large company turned out, 500 being the game as usual. The score cards were works of art. The couple at the top of the table were "Maggie and Mr. Jiggs," drawn to life; then there were Monahan and Jiggs, Norah, Captain and Mrs. Katzenjammer, Hans and Fritz, Mutt and Jeff, Uncle Sam, &c. (drawn by Mrs. Currie.) The usual 500 was played until 12 o'clock, when supper was served. Thereafter games of all kinds were entered into with spirit till early morning when Auld Lang Syne was sung around the host and hostess. A few visitors were present.

ST. PATRICK'S DAY

On St. Patrick's Day (in the evening) a very enjoyable party was held at the home of Mr. and Mrs. Ed. Proctor. About twenty visitors were present for a friendly game of 500. Everybody wore a touch of green in their get-up, and before starting to play the ladies all dressed in Irish mob-caps of white and green and the gentlemen in Irish caubeens of the same colors. The room was festooned with green and the score cards were heart-shaped and of white with a spray of the "dear little shamrock" painted thereon. After a first-class supper, games were introduced interspersed with Irish songs—The wearing of the green, The minstrel boy, Irish eyes, The low-backed car, etc. A most enjoyable evening was spent.

PECULIAR DEATH OF A HORSE

While "Slim" Keath, who lives some six miles south of Chinook, was absent, last week, at Cayley where he had gone for a couple of horses, a bunch of horses paid a visit to his shack. After looking in the window, one horse more curious than the rest, unlocked the door of the shack and walked in—but its curiosity was its own fatal undoing. Up in one corner of the shack were several bushels of grain and chicken feed which the horse ate plentifully. But while he was enjoying his feed the floor suddenly gave way and the animal fell partly through to the cellar beneath, where it remained in the same position when it was discovered a few days later by a couple of neighbors who were passing by. It being somewhat late they decided to wait until morning and get together a rescuing party. But when they returned in the morning they found the animal dead, and now to get dead horse out the shack will have to be moved.

Municipal Hospital Act

The local legislature has finally passed the Municipal Hospital Act for 1919, with all amendments, whereby the members of the boards for the various hospital districts erected shall be chosen by a vote of the ratepayers. An amendment to section 7, however, provides that the election in municipalities shall be governed by the provisions of the appropriate municipal act.

THRESHERS' LIENS

Judge Winter has just handed down a judgment that has a very important bearing on threshers' liens, in the case of D. Hopkins against Anthony Shubert, in which he finds that a seizure made under the defendant's threshers' lien was not in accordance with the act. He finds that the act does not authorize the breaking open of a building to get out grain in bulk, a certain quantity to satisfy the lien, and goes on to say that even if the act did by implication or by express words allow such a remedy, he thinks it would be ultra vires of the legislature, as being against the policy of the law of the land, by inviting a course of action likely to lead to a breach of the peace.

Judgment was given for the plaintiff for damages to his barn, and the value of 36 bushels of wheat taken under the seizure.

THE U.F.A. AND POLITICS

Three hundred delegates are in attendance at the convention of the Medicine Hat federal constituency, which included Chinook district.

In opening the meeting C. A. Harris, of Oyen district, director declared "the people of Alberta have lost confidence in the professional politician, and we expect our standard bearers to keep our banner flying until we can write victory upon it."

President Wood of the U.F.A. addressed the meeting: Dealing with Canadian affairs he said all political parties had been automatically organized, but "we'll start with local unions to build a democratic political organization." The tone of the speaker's remarks and the applause elicited would tend to the expectancy that the convention may decide to place a candidate in this riding at the federal elections.

ALCOHOL GETS A JOLT

According to an amendment by the senate to the Patent Medicine Act, provision is made for a closer supervision of patent and proprietary medicines, compelling a statement of the amount of alcohol contained in the patent medicine to appear on the wrapper of every bottle, as well as a clear statement of the quantity of other drugs.

EDITORIAL

Memorials to Our Soldiers

A subject which is engaging the attention of the people of Canada, whether they be resident in a metropolitan city or in the smallest hamlet, is the manner in which they can best and most appropriately commemorate the memory of their fellow Canadian citizens who, in the service of their country and Empire, gave their lives in the Great War. There is no difference of opinion that some fitting memorial should be erected in each centre of population in this Dominion, large or small. There is also unanimity of opinion that in every instance the memorial should be just as fine as it is within the capabilities of the people to provide. The only question is what form these memorials should take.

Recalling the magnificent memorial monuments, shafts, statues, arches, fountains, museums and other structures to be found on every hand throughout the countries of the Old World, one realizes that in this new country of Western Canada there is a sad lack of these artistic and inspiring structures. Of course our history has been brief, and but as a passing moment in the life of a nation. We have, of necessity, been obliged to confine attention very largely to the provision of the more practical and utilitarian needs of our pioneer condition. But the time has now arrived when it becomes our duty to commemorate in some permanent manner the glorious memory of our soldiers, and to do so in such a way as to provide a source of inspiration for all future generations of Canadians.

In some sections of the Dominion there appears to be a tendency to exploit this universal desire to provide fitting memorials to our soldiers by erecting some building or institution which is a need of the community in any event. This is not the right spirit, and it should be discouraged. No attempt should be made to capitalize public sympathy with the idea of a memorial in order to provide some service which sooner or later would have to be provided in the public interest. Whatever form the memorial may take, it should be provided because it is a memorial, and not because of any other motive.

Each community will, of course, decide for itself the form and character of the memorial to its own fallen heroes. In some places it has been suggested that this should take the form of an endowment fund for the better education of the children of the poorer people, and thus give them an equal opportunity with the children of the more well-to-do. The establishment of orphanages, hospitals and other philanthropic institutions is urged in other places. In some of the smaller communities the erection of a simple tablet or monument is advocated, while in larger centres a lofty shaft or stately monument or magnificent arch is felt to be most suitable.

The character of the memorial, important as it may be, is after all, not the most important consideration. What is important is the spirit animating the people in providing the memorial, and the lasting effect it will have on the life of the com-

munity. It would, for example, serve but a poor purpose to erect a monument which, poorly designed and crudely executed, would be a constant cause of irritation to the beholder, or, having erected a suitable and artistic monument, to leave it in a state of neglect throughout the years uncarved for amid unkempt grounds and surroundings.

It is not the object of this article to suggest any particular form or forms of memorials to our Canadian soldiers, but rather to lay emphasis upon the desirability of the most thoughtful consideration being given by the men and women in every community to the provision of a memorial of the character best calculated to impress, influence and inspire the children of present and future generations; to inculcate in them a fervent love of country; to develop in their very souls a readiness to make sacrifices and render service to their country and fellowmen, and to keep ever before them the glorious example of the men of 1914-18 who counted no sacrifice too great that liberty might be maintained and civilization live and flourish through the world.

Our soldiers have left a priceless heritage to the nation which should be accorded a lasting commemoration and ever remain a beacon light throughout the ages to come.

DO YOU WANT PINK CHEEKS?

They Can Be Had by Keeping the Blood Rich, Red and Pure.

Every woman, every girl, wants pink cheeks. They mean not only beauty but good health. When a woman's blood is scanty or anemic, her color fades, she looks debilitated, is short of breath and her heart palpates after slight exertion. Sometimes this trouble is accompanied by severe headaches, or pains in the back or joints. This condition is entirely due to weak, watery blood, and can only be cured by making the blood rich, red and pure. For this purpose there is nothing can equal Dr. Williams' Pink Pills, which act directly upon the blood, and give it the way to bring new health and strength to weak, ailing people. Mrs. Anderson, Hearst, Ont., writes: "I was coming to Canada from England, I was a sufferer from anaemia for upwards of a year. I had been gradually getting paler and weaker. I did not realize that I was sick, but felt constantly tired and worn out. I had no ambition for anything, and I was feeling that my brothers used to call me 'snowball.' At this stage my mother decided that she would get Dr. Williams' Pink Pills, which are a favorite medicine in England as well as in Canada. On the day I commenced taking them I looked more like a corpse than a living person. I remained in bed for a week, taking the pills regularly, and then I felt that I was getting up, though not able to go about. From that on, however, I gained strength daily, and in a little more than a month I was feeling as well as ever. I did. The color returned to my cheeks and lips, and my friends were all surprised at my rapid recovery. I took no medicine but Dr. Williams' Pink Pills, so that they deserve all the credit for my restoration to health."

You can get Dr. Williams' Pink Pills through any dealer in medicine, by mail, for 50 cents a box or six boxes for \$2.50 from Dr. Williams' Medicine Co., Brockville, Ont.

Huns Restore Art Treasure

Pictures Stolen From Lille Have Been Returned.

Paris. — Art treasures taken from occupied France by the Germans and removed to Brussels are gradually being restored to the original owners. The Temps reports that three carloads of pictures stolen from the museum at Lille have just been returned and two carloads taken from the region of Laon have been sent back. Among the ten carloads unloaded at Valenciennes were many rare and precious manuscripts and archives of the French government, the bell-fry taken from the Guild Hall at Cambrai and furniture belonging to the Prince of Monaco, the Marquis of Havincourt and other persons.

Minard's Liniment for sale everywhere.

Aluminium in Norway. — A Norwegian factory has succeeded in obtaining aluminium from what is locally known as Labrador stone, which is found in large quantities in the western part of the country. Hitherto this stone has been looked upon as having no commercial value whatever.

Latest French Idea

Paris. — In France duelling has never become extinct and even the war seems not to have eradicated this traditional method of settling arguments between gentlemen. But the war has changed the weapons. Instead of pistols it is machine guns mounted on airplanes, which according to the present indications, will hereafter be called upon to settle affairs of honor.

Shock Left Her Weak and Nervous COULD NOT SLEEP

When the system receives a shock of any kind, the heart becomes weakened, the nerves unstrung, the appetite poor, faint and weak feelings come over you, you can't sleep at night, and you wonder if life is worth living.

To all those who suffer from nervous shock we would recommend Milburn's Heart and Nerve Pills. These are the best remedy to tone up the entire system and strengthen the weakened organs.

Mrs. J. J. Bynum, Pilot Butte, Sask., writes: "I have used Milburn's Heart and Nerve Pills after having suffered from a terrible shock to my whole system. I was so utterly weak and nervous. I could not sleep at night, and my appetite was very poor. I could not walk across the floor without trembling all over. I had hot flashes and fainting spells."

When I was on the second box of your Heart and Nerve Pills, I began to feel that they were doing me good, so I kept on until I had used six boxes, when I felt like a different person.

I am never without them in the house, and highly recommend them to all who suffer with their heart, head, or nerves. The pills are 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Flight Across Rockies

To Demonstrate Practicability of an Aerial Mail Service.

Vancouver, B.C. — The Vancouver World announces that in co-operation with the Aerial League of Canada, it is promoting an aerial flight across the Rocky Mountains. The plans include a flight from Vancouver to Calgary by way of the Crown's Nest Pass, then to Edmonton and home ward by way of the Yellowhead Pass and Kamloops, with a preliminary flight to Victoria and return. It is stated that only Canadian and British airmen are eligible to compete, using machines of Canadian or British make.

The flight is to be under control of a committee of the Aerial League and the World, and trophies and a purse will be awarded. The flight is to demonstrate the "practicability and reliability of an aerial mail service," but the element of competition may be introduced if more than one machine is available. The flight is to take place as soon as machines can be procured from England.

A Jolt for the Ex-kaiser

Amerongen. — Considerable excitement was created at Amerongen castle, where former Emperor William is staying, when six airplanes appeared suddenly from behind a bank of clouds. They came from the east and after circling the castle twice, disappeared in a northerly direction. The nationality of the machines could not be distinguished owing to the overcast weather, but it is generally assumed that they were Dutch.

CITY COUNCIL BOINGS

To put through the license reduction bill will require some tall hustling. Maritime tide of corn will be tramped on. The cure is "Putnam's," the old reliable corn extract that has been curing corns and warts for years. "Putnam's" never fails, 25c at all dealers.

Canadian Steer

Championships

Many Prizes Have Been Won By Short-horns.

Short-horns did well at the Ontario provincial winter fair and at West Toronto. At Guelph, the grand champion and reserve grand champion steers were both Short-horns, while at West Toronto the single steer grand championship and the grand championship for three steers any weight, were both won by Short-horns. A Short-horn calf also took out in the boy's steer feeding competition. T. A. Russell, Downview, carried off the three grand champion-ship at these two shows, and all friends of the breed will extend congratulations.—G. E. Day, Sec. Dominion Livestock Breeders' Ass'n.

The only time the average man is willing to admit that he is one of the common people is when he is running for an office.

GILLETT'S EYE LYE
CLEANS—DISINFECTS—USED FOR SOFTENING WATER—FOR MAKING HARD AND SOFT SOAP—FULL DIRECTIONS WITH EACH CAN.

Alberta Contributed Millions

Edmonton. — The people of Alberta during the war contributed the total of \$42,000,000 toward direct financial aid in the war effort of the Dominion, according to an announcement made in the legislature by Hon. C. R. Mitchell, provincial treasurer, in concluding his presentation of the annual budget.

The bonds purchased in the year of 1918-reached \$19,000,000 and the total contributions to the Red Cross and other patriotic causes amounted to \$5,480,830.

Wooden Steamer Launched

Vancouver, B.C. — The French steamer Champlain was successfully launched at the Northern Construction yards. The ship is a wooden vessel of 130 tons, and is the first of five being built by this company for the French government.

"It Freed Me of Headaches"

This Is What Many Thousands of People Write About Dr. Chase's Nerve Food—Not Mere Relief, But Lasting Cure.

Chauvin, Alta., April 1. — When the human system gets run down, the blood thin and the nerves exhausted, one of the most constant and distressing symptoms is headache. There is always a temptation to use strong drugs to ease the pain, but such relief is only temporary, and is obtained at enormous expense to the nervous system, and the headaches return with increased violence.

Real cure can only be obtained when the vigor of the nervous system is restored by such treatment as Dr. Chase's Nerve Food.

Mrs. Rene Page, Chauvin, Alta., writes: "I have used Dr. Chase's Nerve Food, with splendid results. Some little time ago I seemed to lose my appetite, and suffered from frequent headaches. A treatment for the Nerve Food put me on my feet again. It helped my appetite, freed me from headaches, and restored my health."

I feel like a new man now, and think Dr. Chase's Nerve Food the greatest remedy ever known. I also have to thank Dr. Chase's Ointment for a speedy cure of barber's itch. I have used it for pimples and burns, too."

Certified to by Leger E. Roy, J.P., Chauvin, Alta.

Mrs. H. H. Christoffer, Greenbrier, Sask., writes: "It is a pleasure to me to write you in praise of Dr. Chase's Nerve Food. I suffered for over twenty years from rheumatism, neuralgia, violent headaches and palpitation of the heart. My back ached, I could not sleep, and was always tired and nervous. I had taken a great many medicines of one kind and another, but never got anything to help me until I used Dr. Chase's Nerve Food. This did me more good than all the medicines I ever took, and I cannot say enough in praise of it."

This letter is endorsed by Mr. J. C. Bleich, Postmaster at Greenbrier, Sask.

Dr. Chase's Nerve Food, 50c a box, a full treatment of 6 boxes for \$2.75, at all dealers or by mail from Bates & Co., Limited, Toronto. Do not be talked into accepting a substitute. Imitations only disappoint.

Typhoid in Siberia

New York. — Typhoid is being spread throughout Siberia by Russians from German prisons, according to a cable from Consul-General Harris at Irkutsk, received at the headquarters of the national war work council of the Y.M.C.A. The message said Y.M.C.A. work would be appreciated and that there is the usual drug famine.

Over 480,000 Boxes Sold Each Year

This is conclusive proof that thousands had relief from kidney and bladder troubles by using

DOAN'S BACKACHE KIDNEY PILLS
FOR THE KIDNEYS
Sold everywhere, for 50c. a box.

Says Empire Will Be Resurrected

Ruling Classes of Germany Hopeful of Retaining Power

Paris. — The German empire will be resurrected more rapidly than most people think, Dr. Richard von Kuehlman, former German foreign minister, declares in a letter quoted by Echo de Paris.

According to the letter, von Kuehlman says that the former ruling classes of Germany are still hopeful of retaining power.

The letter says that events are moving as the writer anticipated earlier in the year, when he wrote that Marshal Foch had sheathed the sword and it would not be necessary for Germany to fear France longer. Under favorable conditions, von Kuehlman is quoted as saying, the Germans will be in Paris before 1925.

No Asthma Remedy Like It

Dr. J. D. Kellogg's Asthma Remedy is distinctly different from other so-called remedies. Were this not so it would not have obtained its great work of relief until known from ocean to ocean for its wonderful value. Kellogg's, the foremost and best of all asthma remedies, stands upon a reputation founded in the hearts of thousands who have known its benefit.

Britain's Powerful Warship

H.M.S. Hood Will Be Mine and Torpedo Proof

London. — Details of the biggest and most powerful warship which is being built on the Clyde for the British navy can now be told. The ship is His Majesty's Ship Hood, whose designed speed, the representative of the London Daily News learns on official authority, will be thirty-two knots, and which may be increased during her trials to 35 knots.

Details of the vessel hitherto have been secret. She is a battle cruiser, and her length will be 900, or only one foot less than the Aquitania, the largest of the British liners. The vessel is expected to be in commission within six months. Since the keel was laid down several striking innovations in naval shipbuilding have been made, chiefly as the result of the lessons learned by the experts during 1918, and these have necessitated alterations in the ship's internal arrangements.

She will be mine and torpedo proof, her hull being surrounded by a "blister" or outer-cushion, and there will be steel armored walls inside the vessel which will be an additional safeguard.

Under Red Regime

Munich. — The police have discovered a plot to steal army goods valued at 11,000,000 marks. Twenty-four persons were arrested.

When Holloway's Corn Cure is applied to a corn or wart it kills the roots and the callosity comes out without injury to the flesh.

In view of the great development in the livestock industry in northern Saskatchewan this year, American breeders of prize cattle will invade the province during the coming summer. They will show stock at the Saskatchewan industrial exhibition, July 14-19.

The Beauty of a Clear Skin.—The condition of the liver regulates the condition of the blood. A disordered liver causes impurities in the blood, and these show themselves in blemishes on the skin. Parmentel's Vegetable Purifier is a natural purifier of the blood, and it acts upon the blood and a clear, healthy skin will follow intelligent use of this standard medicine. Ladies, who will fully appreciate this quality of these pills, can use them with the certainty that the effect will be most gratifying.

Troubles in Odessa

London. — Official reports received in London are to the effect that a critical state of affairs exists in Odessa, the chief Russian port on the Black sea.

No communication could be obtained in London to rumors that Odessa was being evacuated by allied forces, but the report is not decided.

Only One "BROMO QUININE"

To get the genuine, call for full name LAXATIVE BROMO QUININE Tablets, and signature of E. W. GROVE, Cures a Cold, Cures a Fever.

No Bread in the Caucasus. — Thousands of men, women and children are starving to death in the Caucasus, according to the first report from Dr. James I. Barton, chairman of the commission recently sent to that region by the United States.

"There is no bread anywhere," says the report, "the government has not a pound. There are 45,000 people in Erivan wholly without bread, and the orphanages and troops all throughout Erivan are in a terrible condition."

Minard's Liniment Cures Dandruff.

"Nothing is certain" as the fisherman said when he found it on his hook.

WHEN YOU SUFFER FROM RHEUMATISM

Almost any man will tell you that Sloan's Liniment means relief

For practically every man has used it who has suffered from rheumatic aches, sore joints, stiffness of joints, the results of wetness, exposure.

Women, too, by the hundreds of thousands, use it for relieving neuralgia, lame backs, neuralgia, sick headache. Clean, refreshing, soothing, economical, quickly effective. Say "Sloan's Liniment" to your druggist. Made in Canada. Get it today.

Sloan's Liniment
Kills Pain
50c, 60c, \$1.20

Irish Appeal to King George

London. A petition has been submitted to King George, signed by a number of Irish officers who served in the British army during the war, praying that Irish home rule be submitted to the peace conference.

She Tells Them

In the Post Office

That Dodd's Kidney Pills Cured Her.

Quebec Postmistress Suffered for Four Years But Her Pain Vanished Before A Short Treatment of Dodd's Kidney Pills.

I have a Brilliant, Gaspe Co., Quebec, March 24th, (Special). — Mrs. Geo. Briand, the Postmistress here, is a sworn friend of Dodd's Kidney Pills. And like a host of others she has a reason.

"I had a pain in my left side for four years," Mrs. Briand says in giving that reason. "It never left me for one single instant."

"I was using two boxes of Dodd's Kidney Pills, with two of Diamond Dinner Pills, the pain ceased, and in over a year now it has never come back."

"I have recommended Dodd's Kidney Pills to the patrons of this P.O., for I keep the post office here, as the best medicine I have ever used."

Dodd's Kidney Pills are no cure all. They are purely and simply a kidney remedy. They cure disorders of the liver, of the stomach, of the lungs, of the heart, disease, diabetes, and Bright's disease. The reason for this is that all these troubles sprang from diseased kidneys.

Dodd's Kidney Pills acting directly on the kidneys, put those organs in condition to do their full work of clearing the impurities out of the blood and the diseases vanquished by the impurities.

Dancing Prohibited

London. — According to a German wireless dispatch received here, there has been no important changes in the situation in Berlin. A dispatch to the Eastern Telegraph from Copenhagen says that on demand of the Majority Socialists, a prohibition against dancing has been issued in Berlin. The dispatch adds that during the week while women and children were being murdered, dancing in fancy dress was going on in the streets.

HE'LL like the self-stopping razor that gives him a fresh, keen edge each day; he'll welcome the simplicity that enables him to clean his AutoStop Razor without taking it apart; most of all he'll be glad of the military-like efficiency with which the AutoStop Razor goes "over the top" and removes the toughest "barbed-wire" beard without the slightest "pull" or irritation.

The AutoStop Razor is a gift he'll be thankful for every day of his life — a lasting memento of your thoughtfulness.

CUTICURA
Heals Skin Trouble With One Cake Soap and Two Boxes Ointment.

Terrible itching on back of neck. After three weeks got sick and became sore. Was red and scratching caused sleepless nights. Got Cuticura Soap and Ointment. Itching not so bad after using them. Now healed. From signed statement of Mrs. William Quigley, Windsor, N.S.

If Cuticura did no more than soothe and heal eczemas, rashes, itching and burnings, bringing speedy comfort to tortured, disfigured men, women and children it would be entitled to the highest praise. But it does more. By using the Soap exclusively for toilet purposes, allowing no other soap to touch your skin, you will many cases prevent these distressing experiences.

For Free Sample Each by Mail Address post-card: "Cuticura, Dept. A, Boston, U.S.A." Sold everywhere.

Hungary with Bolsheviks and Is Talking War

Budapest. — The Hungarian cabinet, headed by Count Karolyi, has resigned, leaving the government to the proletariat.

This action was taken after Count Karolyi had communicated to the cabinet the entire note outlining the new boundary between Hungary and Rumania. After advising Col. Kiss, commander of the French troops of occupation, of the decision of the cabinet, Count Karolyi then resigned.

London. — The Budapest government is reported to be signing a proclamation, acknowledging a state of war between Hungary and the Entente, says a dispatch to the Exchange Telegraph company, from Vienna.

The dispatch adds that the Czechoslovak is preparing to issue a mobilization order.

Copenhagen. — The proclamation of Count Karolyi, announcing the resignation of the Hungarian cabinet, of which he was the head, after referring to the decision of the peace conference at Paris to occupy Hungarian territory, says, according to a despatch from Vienna:

"The entire mission declared that it intends to regard the demarcation line as the political frontier. The aim of further occupation of the country is manifestly to make Hungary jumping-off ground and region of operations against the Russian-Soviet army, which is fighting on our frontier. The land evacuated by us, however, is to be the pay — the Czech troops, by means of whom the Russian-Soviet army is to be overcome. "As provisional proof of the Hungarian people's republic, I turn against the Paris peace conference to the proletariat of the world for justice and support."

The new Hungarian-Soviet government intends to effect an alliance with the Russian Bolsheviks, according to a telegram which the Berlin correspondent of the Budapest Pestnaplo says he has received from that city.

According to this telegram, three Russian envoys already in Budapest, declare that a Russian Red army is now on a line from Brody to St. Aizulu and is advancing on Lemberg, approximately 75 miles distant. This army, the telegram continues, is expected to arrive in Budapest within a fortnight.

Ships Sail for Food

London. — Eight German steamers, including the Kaiser, in August Victoria, Cleveland, Graf Waldersee and Preloren, sailed from Hamburg for foodstuffs, according to advices from Berlin. It is said that the crews of the ships made a formal demand that they should not be removed from the vessels during the trip.

Aviator Makes Long Flight

London. — The first account is now officially published of a remarkable long-distance flight over the North sea which was performed by a British non-rigid airship, the U.S. 11, during the past few days.

The voyage took the form of a circuit, embracing the coast of Denmark, Schleswig-Holstein, Heligoland, North Germany and Holland. The trip was characterized by extremely unfavorable weather and therefore it ranks as the most notable flight ever undertaken. The total length of the round trip was twelve hundred and eighty-five air miles, and the time taken was about forty and a half hours.

Riots in Egypt

London. — In connection with the trouble in Egypt it is reported that a large number of armed Bedouins have entered Bahaira province, lower Egypt, from the west and are robbing towns and villages.

The situation is not regarded as presenting any military danger. The Turkish flag is reported to be flying in some villages of Bahaira province. There are no reports of any casualties having been suffered by the military, but some prominent native officials and several Egyptian police have been killed.

Don't Want to Leave

Vienna. — Former Emperor Charles' entourage deny the report that he has sought permission to live in Switzerland. One of the officials said: "The imperial couple themselves have not made such a request, and their departure is not planned for the present. The former emperor and empress desire to reside in Germany. Austria, if there are no disorders or outbreaks."

Wilhelm Saving Wood

But This Peaceful Occupation Attended by Many Dangers for Ex-Kaiser

Amersfoort. — There was a state of the extreme alertness around the von Buntlick castle recently in consequence of the former German emperor having received two violently threatening letters, one emanating from Amsterdam and the other from the Belgian frontier, and also a telegram from a friend, warning him of the menacing peril.

All the armed gendarmes watching over the ex-emperor's welfare were kept on duty. All the garden paths in the neighborhood of the shed where William Hohenzollern was engaged in sowing wood, were constantly patrolled by armed guards.

To Return Prisoners

Paris. — In conformity with the attitude of the British government, the French war office has consented to the immediate repatriation of German prisoners of war born in Danish Schleswig. The first group will be sent to Denmark from Danzig on a Danish ship.

Monument for Laurier

Quebec. — A movement has been started in Quebec to erect a monument to Sir Wilfrid Laurier on Jacques Cartier Square in the very heart of the division of Quebec East, which is represented in the house of commons nearly 40 years.

Big Aviation Prize

Melbourne. — The commonwealth government is offering a prize of \$50,000 for the first successful flight from Great Britain to Australia that is undertaken by Australians.

Polish Situation Pitiful

Lemberg Defended by Women, Children and Boy Scouts

Chicago. — In a letter received by John P. Smulski, president of the National Polish department, Madame Paderevski, wife of the pianist and premier of Poland, described conditions in Poland as "pitiful," and said the Polish army was hungry and without clothes in zero weather, and lacked arms. The letter was dated January 28.

The city of Lemberg was without light, water, food, arms or ammunition, but was constantly bombarded, Mme. Paderevski wrote. "It is defended by women, children and boy scouts," she added, and declared, "our enemies commit the most horrible atrocities."

"Some of the women taken prisoners were impaled on pickets," she wrote. "So were also six nuns who were then removed and hurled in a heap and left to die slowly. Boy scouts were taken and tied together, three or four at a time, with barbed wire and then buried alive."

Continuing, the premier's wife asserted the Bolsheviks were burning, beheading or freezing Poles to death along the border. In Cieszyn the Czechs were killing and hanging, and the German army is advancing on Posen. We are in a trap. I must hold my heart with both hands for fear it will burst with pain," the letter concluded.

Hamburg Strike Failed

London. — A despatch to the Exchange Telegraph company from Copenhagen, says the seamen's strike at Hamburg failed and that the steamers Cleveland and Patricia have sailed.

Discuss Labor Problems at Peace Conference

Offered Baltic Crown

Washington. — Arrival of a British squadron at Libau was a British commission having military and political power to open relations with the Lithuanian government was announced in official despatches quoting the Lithuanian press bureau. Prince Adolf Friedrich of Mecklenburg, is reported to have been offered the Baltic royal crown.

Expected Home About Easter

Ottawa. — The general expectation among members interested in the tariff issue is that the budget will be presented to parliament by Sir Thomas White shortly after the Easter recess, which means about the end of April or early in May.

Sir Robert Borden is expected to return to Canada about Easter, although the date of his arrival may be later. Whatever he may decide to do at a later date, it is authoritative-ly stated that Sir Robert intends to return to Ottawa and again assume the leadership of the Unionists long before the present parliament session is brought to a close.

Paris. — An agreement is made by the peace conference commission on international labor legislation, that the only thing remaining for the commission to do is draw up its final report to the police conference. At the session Saturday the commission completed consideration of the proposals laid before it by a deputation from women's organizations. The meeting was the thirty-fourth held.

In recognition of the principle of self determination in labor questions, the labor commission introduced a clause into its report providing that "No recommendation or draft convention shall in any case be accepted or applied so as to diminish the protection already accorded to workers by any existing laws of any of the high contracting parties."

The intention of the clause is to safeguard legislation already in effect in any country which might be regarded by that country as better for the workers than that recommended by the labor bureau. The report was largely a discussion of the seamen's act in the United States and recognition of the possibility that the bureau might make recommendations on that subject which, while involving the conditions of seamen generally, would not measure up to the standard fixed by the United States.

The labor commission has definitely decided that the findings of the bureau must be supported by moral suasion in cases where special problems exist, rather than by invoking any force the league of nations might offer.

French May Have To Leave Odessa

Chief Difficulty Consists in Scarcity of Foodstuffs

London. — A Russian wireless dispatch received here says the military command at Odessa has issued an order announcing that the French forces have been ordered to return to France from Odessa. The dispatch adds that the newspapers announce also the departure of the French consul.

According to advices received in London, the French are still in Odessa. La Liberté (Paris) says it understands the rumors of the evacuation of Odessa are premature and that the French general, Franck D'Esprey, was expected to take charge of the situation.

La Liberté declares that the chief difficulty consists in the scarcity of foodstuffs, which favors Bolshevik propaganda, but that if the allies decide to evacuate Odessa, they still will hold Sebastopol.

Visitors to Germany Require Permit Berlin. — Because of the great number of military and civil entente missions which have visited Germany since November, the German cabinet has decided, according to the Kreuz Zeitung, that no persons from an allied country will henceforth be permitted to travel in Germany without special permission from the armistice commission.

League of Nations Plan Comes First

Paris. — When the Germans come to Paris in about fourteen days, they will have to sign a preliminary treaty of peace containing a clause which definitely commits the signatories to a league of nations. This is the view of the highest American quarters and the Americans have no desire to depart from it, according to a U. S. newspaper correspondent. In spite of numerous statements from official and unofficial sources in Paris that the league of nations will not be incorporated in the preliminary treaty, the president is going courageously ahead with the league and it is not likely judging by his record, that anything will sway him from his object.

The American program for the preliminary treaty of peace is now well defined in the minds of Americans in high places. It embraces three separate points: 1. It will abrogate the state of war with Germany and define, in general, Germany's frontiers and obligations. 2. It will definitely commit the signatories to a league of nations. 3. It will probably throw the discussion of all the disputed points dealing with the new frontiers in the Balkans and in Asia Minor and all questions affecting the war with Austria, Bulgaria and Turkey, to the league of nations itself.

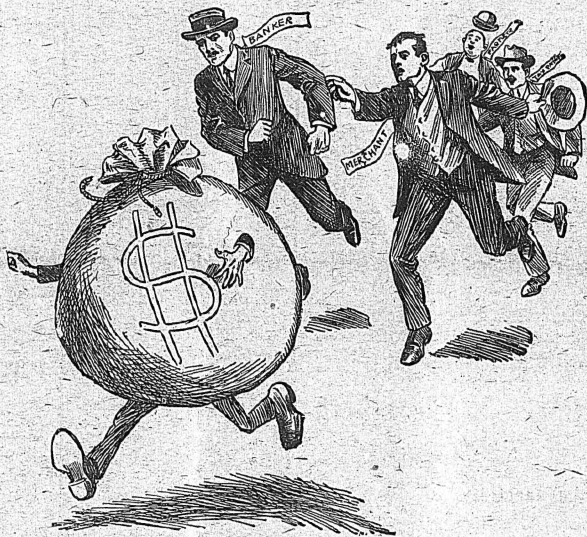

The third point is not yet generally accepted by the Americans as it is expected to be, but there is little difference of opinion on the first two. Making peace with Germany is today regarded as absolutely essential by all the nations at the conference. The second point has been the subject of dispute. Last Sunday at the conference of newsmen with Foreign Minister Pichon, I heard him say definitely that the league of nations

would not be contained in the preliminary peace treaty. On Thursday of last week Mr. Pichon made the same statement. Mr. Pichon declared that it would be perfectly proper in the final treaty.

On Saturday afternoon attention was directed at the American headquarters to the unsatisfactory statement of the peace conference for the league of nations as an integral part of the peace treaty. It is now known that the Americans mean it to be part of the preliminary treaty and that when this has been signed the great nations will have signed their willingness to go ahead with the league of nations and that Germany also has accepted it subject, of course, to ratification by such legislative bodies as the constitutions of the various states call for.

It is known that the United States has the support of the British to incorporate this league clause into the preliminary treaty. The French objections seem to be based on the idea that the preliminary peace should settle a lot of things which may come under the league of nations for disposal. The French, it will be remembered, have always favored a league which would definitely protect France from a resurgence of German attacks. The idea of a league found favor so long as the idea of an international army was at the forefront. France wants the league to act the moment aggression occurs and not to go into a plenary session while the Germans are burning French towns.

The point of view is perfectly logical and in American circles is regarded with respect. The only difference with the American view is that the French view embraces only France while the American view embraces the world.

GET AFTER THOSE DOLLARS

Our town should get all of the trade in our trade area. We can't worry about our neighboring town's business. We have enough to do to take care of our own. But we should get all of our own. How about these dollars that are getting away from us? How about the dollars that are slipping through our fingers? We have the goods. We have the values. Our prices are right. And yet there is a lot of money slipping away from us constantly. The best way to get after this money is to tell the truth about the man or the system that is taking it away. Join the Trade-at-Home campaign.

Prefer to Become Outlaws

Hun President Says Unjust Peace Cannot Be Signed

Berlin. — "Germany is prepared to sign peace but is not prepared to commit harikari," the Falschian figure of Fritz Ebert, president of the new German republic, straightened in the chair and with a sonorous voice continued: "If the peace terms mean suicide they will not be signed. Rather than political and economical death, Germany will choose political and economical madness. If the entente offers us instead of a peace based on Mr. Wilson's fourteen points only a knife with which to commit harikari Germany goes Bolshevik, Germany joins the Russian soviet republic and Germany becomes an outlaw nation."

Restrict Liquor in West Africa

London. — The government has prohibited the importation of all spirits into the British West African colonies, except under license, which will not be granted for the importation of so-called "trade spirits." It was announced. This decision was taken as a preliminary measure, pending decision on the question of the permanent prohibition of the spirit trade in West Africa.

Famous Battalion Disbanded

Men of Princess Patricia's Have Received Discharge

Ottawa. — The famous Princess Patricia's Canadian light infantry, Canadian expeditionary force, is no more. Demobilization has been completed, the last man being discharged and the unit disbanded. It is considered the demobilization constitutes a record for speed.

There was a touching scene as Lieut. Col. A. Hamilton Gault, organizer of the unit, bade the men farewell.

Many of the men have left for their homes, those living at a distance being provided with first class sleeper accommodation and tickets, in addition to generous allowance for meals en route. Toronto and western men were among those who have left.

U.S. Senator Asked to Resign

Jefferson City, Mo. — James A. Reed, United States senator from Missouri was called upon to resign his seat in the senate in resolutions adopted here by a conference of fifty of the sixty-seven democratic members of the house.

The action was taken, conference leaders announced, as a result of Senator Reed's address to the legislature in which he attacked the proposed league of nations.

Allies in Russia Clash With Bolsheviks

Archangel. — Patrol activity has increased considerably along the Volga railway and on the Dyina front. On both sectors the Bolsheviks have been defeated by the allied and United States troops.

A small Bolshevik raiding party making its way over the snow, surprised an allied artillery position in the forests near the Volga railway. After considerable fighting in the darkness, the Bolsheviks were repulsed, leaving a number of dead behind.

Following up last Friday's success on the Dyina, when the Americans and Russians repulsed a raid against the allied lines of communication, a United States patrol encountered a Bolshevik patrol in a wood. A number of the Bolsheviks were killed and the others of the party were made prisoners.

As the winter has been unusually mild in northern Russia, it is expected that within a month the thaw will come to make extensive land fighting impracticable. The Bolsheviks

will have a big advantage when the rivers open. The Dyina and Vaga rivers will be navigable near the fighting front before the Dyina is opened up further north near Archangel. This condition would permit the Bolsheviks gunboats to reach the vicinity of Berezuk before the allied flotilla can steam southward to meet them.

Efforts are being made, however, to speed up the arrival of the allied fleet in the fighting zone, in order to confine the Bolshevik advantage to the shortest time possible. In the meantime, as long as the present cold weather continues, it is a race against time to move over the snow before the thaw comes, sufficient big guns and ammunition to hold the enemy boats in check until the allied vessels can move southward.

In this work, the allied transport service is performing a stupendous task in spite of the shortage of hay and oats, which has weakened the horses for the long hauls over the snow and added greatly to the difficulties of the situation.

MONEY TO LOAN

Oeler, Hammond and Nanton,
general agents for
North of Scotland and other
Mortgage Companies
have \$30,000,000 invested in farm
loans in the West, the returns from
which they re-invest in the same way.
They have lots of money now. Their
Inspector, Mr. Slickney, who was in
the district a few days ago, says
"They have barrels of money, and
that no good loan will be refused".
Let them renew the loan you have
on your homestead, and give you
more on your pre-emption, give
you money to prove it up if you wish.
Or let them give you a new loan, as
large, and probably larger, than you
can get elsewhere. The district needs
all the money we can get hold of in
this way. Pay up your indebtedness
to the bank, to the municipality, to
the school, and to others. We can
furnish the money. Loans for five
years, repayable in three years, with-
out extra charge. Interest at 8 per
cent., nothing but the interest to pay
each year.

Rule of Blood In Petrograd

Stockholm. — All the relatives of the officers of the eighty-third Russian regiment, which went over to the White Guards as against the Soviet government, have been executed, according to dispatches from Petrograd.

The executions were ordered by the military revolutionary committee of Petrograd. A number of well-known Russian officers, it is added, also have been executed, after being convicted of charges of having spread false rumors regarding the Soviet government.

Success is Certain

French Commissioner Believes in Society of Nations
Paris. — Capt. Andre Tardieu, the French high commissioner for Franco-United States war matters, speaking at a banquet given by the inter-allied press club in honor of the United States peace commission, said:

"Of the great work in which we are all laboring together, half is on the way and its success is certain."

"It must be pointed out with justice that the common will of the governments wanted a league of nations, and to impose that will they had to struggle almost everywhere against the force of incomprehension, against political intrigues, and often against the imprudence of newspapermen. The success which the governments have achieved in remaining faithful to themselves has not been an easy success, and by maintaining unbroken ideals and facts, these have rendered a service which will be recognized later."

"Stories of absurdities are lies; involuntary errors are prehistoric manifestations; these are commissions of political parties; sometimes, perhaps, it is the underhand work of the enemy."

"We have known all that it has created at certain periods in the public mind about the conference a cloud of speculations. But here is the sun rising and beginning to disperse the clouds, and shortly there will remain only a bad remembrance."

"Our aim is clear and simple. We must place the maximum of obstacles between the idea of war and the act of war."

Aim at World Revolt

Russian Soviet Approves New Ministry to Promote Program

London. — The Russian Soviet government, with a view to promoting a plan for world-wide communist revolution, has appointed as a new minister to be known as international commissary, according to a Helsinki dispatch to the Mail, quoting an advice from Moscow.

The new minister is a Swiss named Moor, who was a friend of Nikolai Lenin, the Bolshevik premier, and Leon Trotsky, the Bolshevik minister of war and marine, when they lived in Switzerland. Moor is said to have been given unlimited financial and political powers at Moscow.

His under-secretary is reported to be a former French army captain named Sanoel, who went to Russia with the French Socialist leader, Albert Thomas, during the Kerensky regime.

An important role in the ministry is also attributed to a "British friend" of M. Tchitcherin, the Bolshevik foreign minister.

More Cruel Than Bolsheviks
London. — The behavior of the Spartacists in Lichtenberg was worse than the Bolshevik cruelties in Russia, Berlin advisers received in Copenhagen and transmitted by the Exchange Telegraph company say.

All well-dressed citizens appearing in the streets were robbed and many were killed. Several persons were decapitated and the heads were carried through the street by female Spartacists. The government troops, it is added, continue to kill every prisoner they take.

Berlin. — The Spartacists have opened negotiations for surrender to the government forces, according to reports in circulation.

Geneva Suggested as Capital for League

Paris. — An invitation was sent out to all the neutral nations in Europe, Asia and South America, asking them to attend a private and unofficial conference on Thursday, March 20, with the object of giving neutrals an opportunity to present their views on the league of nations. The invitation was sent by the conference authorities to the ministers of the neutral powers in Paris, and they forwarded it to their governments.

Britain Claims Enemy Cables

Subject Has Been Referred to Legal Experts

Paris. — Realizing the possibility of a virtual monopoly of cable communications by Great Britain, should her claims to the captured German cables be sustained, the United States delegates to the peace conference are endeavoring to make a strong presentation of their case, before the legal authorities to whom the subject has been referred.

The naval experts who first considered the question were unable to agree, and the supreme council, upon the motion of Secretary of State Lansing referred to legal experts the question of title involved. These experts are being pressed by the United States for a report. Early in the war the British cut two German cables from Emden to America by way of the Azores, and also the cable between Montevideo, the Brazilian capital, and Brazil. They took an end of the German-American cables to Halifax, thereby securing another trans-Atlantic line. The other cable they gave to the French government which so far has made no attempt to utilize it, probably because of the scarcity of submarine cable material and of cable-laying ships.

Refused to Handle Liquor

Glasgow Dock Workers Would Not Touch Consignment

Victory. — Glasgow dock workers, disgruntled because of the restrictions placed on the sale of liquor in the United Kingdom, point blank refused to handle consignments of liquor stored at Tideside for export when the Harrison direct line steamer Professor was on the Clyde. The dock workers contended that as the liquor was to be sent to the regular supply of liquor it was against the principles of labor under the circumstances to aid in supplying other countries with shipments of "booze." As they could not get a full ration of liquor they were determined that no one else outside Great Britain should have the opportunity.

A large shipment of liquor was manifested for shipment to Colon, San Francisco and the government stores at Victoria and Vancouver but remained behind on the docks as a consequence of the refusal.

Spartan Rebels Punished

Only Minor Fights Now Occurring in Berlin

London. — A German government wireless dispatch received here says that according to official announcements there had been no more important fighting anywhere in Berlin. A slight attack on the staff quarters of the government troops in the suburb of Neukolln was frustrated. There were occasional unimportant engagements in Charlottenberg and various places in east Berlin.

A military order, affecting a number of streets in east Berlin, has been issued, says the wireless dispatch. The order declares that anyone found in these streets after seven o'clock in the evening will be shot.

The Berlin newspapers, the dispatch continues, say that the Spartacists visited Herr Noske, secretary of military affairs, to inquire into peace conditions. It is rumored that after protracted negotiations, the military demanded the unconditional surrender of the Spartacists and also the yielding up of their arms.

Success is Certain

Switzerland has already replied favorably to the suggestion. No South American governments have yet answered.

A strong sentiment is developing in high quarters of the conference towards making Geneva the official seat of the league of nations. Several of the heads of the delegations, who have been consulted, have given their approval.

Huns Appoint Peace Delegates

Weimar. — The German delegates to the peace conference will be Count von Brockdorff-Rantzau, the foreign minister; Dr. Eduard David, majority Socialist and first vice-president of the national assembly; Dr. Adolph Warburg, Dr. Adolph Mueller, minister to Switzerland; Professor Walter Schuecking, of Marburg University, and Herr Gieseler, minister of posts and telegraph, and the Prussian ministry.

Professor Schuecking late in 1914 published a letter blaming Russia for the European war.

Berlin. — In official circles it is believed that the peace negotiations, in which Germany will take a part, are very near at hand. It is learned that the instructions to German experts to hold themselves in readiness to leave for Paris on March 17 or March 19 with the German delegates, were based on a remark made by General Nudant the representative of Marshal Foch at Spa. In recent negotiations with the German armistice commission, General Nudant is reported to have said that the allies probably would be able to begin negotiations about March 20 and that the preliminary peace might be concluded by April 10.

Seeds for Russia

Start in Such Trade Considered Significant and Important

Bradford, Man. — The first shipment of garden seeds ever sent from Canada to a foreign country, left here last week. It consisted of seeds of two tons of beet, cucumber, radish, parsley, cabbage, onion and turnip seed, two-thirds of it in one ounce packages and the rest in three pound and five pound sacks.

The order goes to Vladivostok, Siberia, under orders from the department of trade and commerce for the Dominion government, and will be used there by the Canadian economic mission to Russia in the work of reconstruction that this country is assisting in that devastated land.

The whole shipment was sent, express to catch the steamer "Cyclops" leaving Vancouver for Vladivostok. This order follows a request sent to the McKinnon Co. about a month ago for quotations and it was obtained in open competition with the eastern seed houses. The telegram ordering the shipment was received and the entire order was prepared, packed and delivered within a few days, making a record for such performance. A superior quality of seed was supplied, the shipment being subject to government test.

This order is probably the forerunner in the development of a large trade from Canada to Siberia. It is apparent that seeds suited to this part of western Canada are suited to similar areas in Siberia and this applies to other lines of goods, particularly, along agricultural development. Russia has not in the past looked to Canada for garden seeds or other supplies for agricultural development, and this start in such trade is considered significant and important. That a western firm filled the order may also have significance.

Perfection in Disinfectants

Liquid Can Be Made Non-Poisonous By Electricity

It is stated that since the New York department of water supply added a small amount of chlorine to the water, not a single case of typhoid fever has occurred which could be traced to the city water. A far more remarkable achievement in water purification, however, is presented by the equipment devised by British chemists for the use of the army in France. It was so perfect that, an equipment on a barge could pump foul water from a canal and deliver it in large quantities purified for drinking purposes. In view of the New York success, it is proposed that chlorinated water be used for sprinkling the streets to prevent the spread of infection. This proposal has been anticipated to some extent, by the Poplar Borough council in the east end of London, which for many years has provided, under the direction of the medical officer of health, free supplies of such disinfectant produced by an electrical process. It is freely used for public institutions, for flushing drains, and for other sanitary purposes. Electricity is passed through a solution of certain salts, converting the liquid into an effective non-poisonous disinfectant which can be stored unimpaired for long periods.

A Reston citizen has a hen that hatched out a brood of chickens last week. He claims the championship of Manitoba in this line.

German Ships To be Seized

Berlin. — The mercantile fleet in German harbors, the disposition of which would be decided at an early date at the food and shipping conference at Brussels, consists according to German figures, of 723 steamers of 1,986,700 gross tons and 136 sailing vessels of \$2,600,000 tons. The sailing ships will, however, be left by the entrance to Germany for international trade.

The steamer figures include steamers finished during the war, but not the unfinished steamers, which the Germans continue to insist cannot be demanded under the armistice.

The fate of Germany's steamers in neutral ports is not absolutely known although many of them have probably been seized. The German information regarding the action of neutral governments is incomplete.

The total tonnage that may be surrendered to the entente is approximately 2,250,000 gross tons.

Rumania's Plight

Queen Says Only Food Will Save

Paris. — Queen Marie of Rumania, declares that in spite of the plight of her country and the sufferings of the people in the war there is no danger of Bolshevism there if supplies of food can be secured. Speaking of conditions in Rumania during the war, the queen said:

"We suffered even worse than did Belgium. She had Great Britain and France by her side, and behind them stood the United States, while we had only Russia to depend upon. When the Russians came to assist us they were never of any real aid. German plotters saw to that, and when Russia broke we were absolutely isolated."

Going Ahead With Stockyards

Prince Albert, Sask. — Preliminary work is well under way in connection with the establishment of the provincial stockyards and many commission buyers have written requesting office space. It is intended to hold an organization meeting within a few weeks to which the members of the legislature, representing 17 northern seats, will be invited, at which it is hoped, shares will be offered for sale and organization completed.

Table Natural Resources Report

Winnipeg. — "The negotiations are not closed and we hope before the end of the present session of parliament at Ottawa they will take up again the question of the transfer of the natural resources in the provinces in the west," said Premier Norris, in laying upon the table of the legislature the report of the conference between the Dominion government and the representatives of the nine provinces.

To Gather Mines With Airplanes

Paris. — While it is expected the terms of peace will prohibit the use of airplanes by Germany for war purposes, the drafting committee was directed to make clear the distinction between commercial airplanes in the terms incorporated in the peace terms. All forms of military airplanes are barred to Germany, the only exception being the temporary use until October 1, of 100 hydro-aeroplanes and 1,000 men in gathering mines in the North sea.

Building Prosperity Indicated

In the thousands of letters, questionnaires and reports received in the Department of Labor during the last month from building interests the country over, there is one proposition on which there is complete agreement. None suggests that the future of the building industry will bring anything other than unprecedented activity and prosperity.

Horses for Soldier Settlers

Regina, Sask. — Arrangements have been made by the old and new boards for the stabling of horses which are to be offered for sale to the soldier settlers by the board. It is expected 500 horses will be collected here. Saskatoon will be a central point for 100 horses for the north.

Strikers Mobilized

Madrid. — The street car employees at Barcelona went on strike and the minister of the interior has announced that the men were at once mobilized under government control. He declared that the same measures would be applied to employees of any other public utility corporation who go on strike.

Favor Liquor Vote

Winnipeg. — Manitoba grand orange lodge members have voted in a resolution introduced by James Wilton favoring a Dominion wide referendum on prohibition.

Keep Aviators In the Far East

London. — In presenting the air campaign, estimates to the house of commons, General Seely said it was intended to keep 102 squadrons for defence, but that the country would not rely so much on the number of machines as in remaining in the forefront of aerial development. Air forces, he added, would be maintained in Egypt, Mesopotamia, Archangel and the near and middle east. He pointed out that the political officer at Baghdad would be able, by airplane, to carry out in two days, the same number of inspections, in order to secure continuous friendly relations with the inhabitants, as would previously have taken two months.

General Seely said that a large part of the estimate would be available for the encouragement of civilian aviation. Daring on the enormous scientific development in aviation, he indicated the discovery of the wireless telephone, by which aviators are able both to send and receive from the same operator.

Row Over Flax Seed

British Government Intended Surplus for Prairie But Ontario Gets in First

Ottawa. — There is a merry row on over possession of ten thousand bushels of flax seed, which represents the unexported residue of the 110,000 bushels commandeered for the British government last year. A cable received says the British government consents to the seed being diverted to Manitoba and Saskatchewan to be reproduced there. Western Ontario interests claim they have the first call on it and that their industry will be wiped out practically unless they get it. They are also representing that flax seed cannot be grown in the west. Some hot cables were sent to Manitoba and Saskatchewan to the Ontario producers' claims.

No Airplanes in War

Paris. — The aerial terms of the German disarmament as adopted by the supreme war council provide that airplanes and dirigibles shall no longer be used for military purposes. The council concluded that it was not feasible to prohibit airplanes for commercial uses.

Oppose Unity With Huns

Austrians Believe Austria Should Be Proclaimed Neutral Country

Berlin. — Many Austrians living in Switzerland as well as Austrians in Vienna oppose the joining of Germany to Austria to Germany. The Austrians here declare that the joining of Austria to Germany is desired only by a small, but noisy, minority, supported by German propaganda.

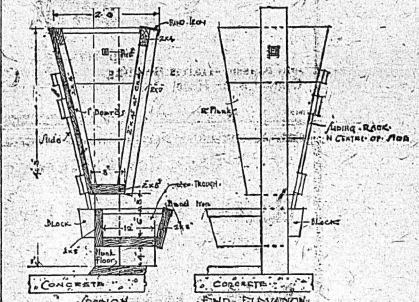

The Austrians believe that Austria should be proclaimed a neutral country. The Vienna Reichspost, in a recent editorial demands that the territory of Austria be respected and opposed, though rather tamely, the joining of Austria to Germany. Prince von Furstenberg, former Austrian ambassador to Spain, in an article in the Neue Freie Presse aligns himself against the proposal to deprive Austria of her independence.

Russians in Agreement

Washington. — The Ussuri Cosacks in Asia have voted for a recognition of the Kolchak Siberian government as at Omsk and have come to an agreement with General Semenov, according to advices to the state department from Irkutsk.

A HANDY FEED RACK

Courtesy of The Western Retail Lumbermen's Association Service Dept.

This combination feed rack and water trough for loose stock is the type which has been installed in many of the best farms in the west, and has proved highly satisfactory. The rack is hung on a pivot and can be swung inward for the purpose of filling the water trough from the feed alley without interference by the stock.

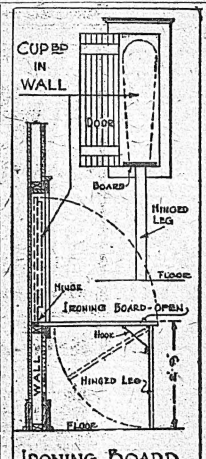

Arab Prophecy Fulfilled

There is an Arab legend which I heard often out in the East, says John H. Finley, in Scribner's, that not until the Nile flowed into Palestine would the Turk be driven from Jerusalem—a picturesque way of intimating that the Turk would stay there forever (as in Virgil's First Eclogue) a like prophecy was made, two thousand years ago, of the impossibility of the Germans reaching the Tigris.

But the Nile now flows into Palestine, not metaphorically, but literally. I have seen the plant at Kantara, where (under the direction of a Canadian engineer) the sweet water of the Nile is filtered and started on its journey through a 12-inch pipe across the desert toward Gaza. The mound of sand that protects it is visible a few yards from the railroad all the way from the Suez to the edge of Palestine and is said to have been driven from Jerusalem by the same forces that caused the water of the Nile to flow into Palestine.

Dominion Parks Figures

The Dominion parks of Canada, which are maintained as wild life sanctuaries, include an area of 7,927 square miles, or more than 5,000,000 acres, nearly equal to one-half the total area of Switzerland, almost as large as Belgium, and nearly 1,000 square miles greater than the area of Wales. Jasper Park alone, which includes 4,400 square miles, is larger than Montenegro and almost twice the size of Prince Edward Island, as shown by a data furnished by the Dominion parks branch, department of the interior.

There are many conveniences that can be suggested to a woman to save her steps, and useless work. Among them is the compact ironing board and cupboard which can be installed in the kitchen at very little cost as shown in the above cut. This consists of an ordinary ironing board hinged at one end and a hinged support. When not in use it folds back into a small cupboard recess in the wall and is out of sight yet at the same time is always ready for immediate use.

Nasty Throat Droppings— Catarrhal Discharges Quickly Cured

Doctors recommend Catarrhal Discharges, it is nature's own cure. It drives out the germs, cleanses sore spots, cleans away every vestige of Catarrhal taint.

You send the soothing vapors of the pine woods, the richest balsams and healing essentials, right to the cause of your cold by inhaling Catarrhal Discharges. Little drops of wonderful curative power are distributed through the whole breathing apparatus by the air you breathe. Like a miracle, that's Catarrhal Discharges. Cures bronchitis, Catarrhal, cold, and irritable throat. You can breathe its healing fumes, and every trace of disease flees as before fire.

So safe, infants can use it, so sure to relieve, doctors prescribe it, so beneficial in preventing winter ills that no person can afford to be without Catarrhal Discharges. Used in thousands of cases without failure. Complete outfit \$1.00, lasts three months, and is guaranteed to cure smaller size 50¢, all dealers or the Catarrhal Discharge Co., Kingston, Ont.

Carmen's Messenger

HAROLD BINDLOSS

WARD, LOCK & CO., LIMITED
Lancaster, and Toronto

(Continued)

She hated Walters with a half instinctive hatred that reflection showed her was justified; but beyond the concession he had made, Lawrence would not be aware of the surface, so to speak, he was logical and she was not. She was sure Walters had plotted to leave him on the coast, although she admitted that he had meant to save his life when he turned dizzy upon the trunk. It was possible that he had intended to do her a great deal of good, but she did not accept the explanation. The fellow was cold-blooded and ruthless; she thought he had deliberately let his opportunity pass, because, after that, nobody would believe him guilty if he found another. But she could not find an opportunity, and it was a keen relief to know that Foster would arrive. She had not told Lawrence yet; it might be better to let Foster make an excuse for his visit.

When it began to get dark, she stood near the glass, and saw the and and glanced at her watch. She could see for some distance down the valley and knew that the smoke of a locomotive would spread in a dark cloud above the tops of the pines. The train was late, but there was no smoke yet. It was a long climb from sea level at Vancouver Inlet and in winter the line was sometimes blocked. There was no obvious ground for alarm, but somehow she was worse afraid of Walters than before.

The massed pines gradually faded to a formless blue in the cold grey spaces of snow. There was no sound from the valley but the roar of the river, and by and by a servant turned on the light. Lawrence could now see outside and shivered as he looked at her watch. She hoped no accident had delayed the train.

In the meantime, Lawrence, who was sitting near her mother, had picked up a book, but put it down when Walters came in, and Lucy felt a curious tremor of repugnance as she glanced at him. It was a shivering she sometimes experienced at the sight of a noxious insect. Yet there was nothing about Walters to excite aversion. He was rather a handsome man, and stood in a careless pose, smiling at the group.

"The trouble about a pleasant time is that it comes to an end, and I'll have to pull out tomorrow," he said. "When are you going to give me the photographs you promised, Lawrence?"

"I'll get them now and you can choose which you like. They're in my room."

"I want one with Miss Stephen in it as well as yourself," Walters replied. "It will be something to remind me of our climbs."

"Send the boy for the packet," Lucy interposed.

"I think the drawer's locked; anyhow I don't want the boy to pass things," Lawrence objected.

"Then I'll go with you," said Walters. "It will save you taking the packet back and you can get ready for dinner while you are upstairs."

Lawrence got up. "Very well, we'll go now."

"Take the elevator, even if you have to wait," Lucy said as they went to the door.

Lawrence had chosen a room at the top of the building, because the view was good and it got the sun early in the morning; but now and then he walked up the stairs to see how the view was recovering its strength. After a minute or two, Lucy heard the elevator start and his harsh rattle jared her nerve. The electric lift they use in Canada seldom runs silently, and the elevator had not been working well. Lucy was annoyed by the sound, but did not recover from the shock of getting the walk. She was nervous, and she did not like Walters to be out of her sight when Walters was with him. She tried to persuade herself that he was foolish, but could not banish her uneasiness. Then Mrs. Stephen looked up.

"There's the train; I didn't hear it stop."

Lucy listened. She had forgotten the train for the last few minutes, and it seemed to her that the sharp snorting of the mountain engine and rhythmic change of wheels seemed to indicate that the long climb had not been interrupted. The Montreal express did not stop at the flag station unless the conductor was warned. She felt daunted as she realized that Foster might not have come, and she had not told her mother she had telegraphed for him.

A few minutes later she heard steps outside; then the door opened, and she felt a thrill of satisfaction as Foster came in with Pete. He looked grave and rather hot, as if he had been walking fast, but it was strange, for Foster looked so comfortable when he turned to her. Besides, she liked his big, companionable, well-worn Scottish clan.

Foster bowed to Mrs. Stephen and then turned to Lucy.

"Is Lawrence all right?"

"Yes. He overruled himself this morning, but is better now."

Foster looked relieved. "Is Walters here?"

"He goes tomorrow."

"Ah! That's just as it has been thought this important. I should have arrived yesterday if your message had come earlier. I got it just after the train started this morning."

Mrs. Stephen looked at her daughter, but Lucy offered no explanation. Foster's abruptness disturbed her. He obviously wanted to understand the situation, but seemed to think he had no time to lose.

"I sent the telegram half an hour before the office closed and as the agent goes early you ought to have got it in the evening," she said.

"Then it must have been kept back. Where's Lawrence now?"

"He went to his room with Walters about ten minutes since."

Foster beckoned Pete. "Then I'll go straight up; I know the number."

But he started to go down, feeling disturbed but somewhat comforted. It was plain that Foster shared her fears and knew more than she. But he would not say so. He would join his comrade, and Lawrence would be safe when he was in.

In the meantime Walters lit a cigarette. Lawrence gave him "his" room and Lawrence down to examine the photographs. There were a number of views of the mountains, and a group of figures occupied the foreground. Walters said, "A good shot, but with some later for photography had taken the picture, and after a time Walters picked out the room where Lawrence was. He said, 'I'll take these, if I'm not troubling you,' he said and waited until Lawrence came. 'There's a picture of you,' he resumed. 'Well, I suppose we had better go down. Are you coming?'"

He went out and as Lawrence crossed the door to turn off the light, called back: "I forgot the pictures; they're on the bureau. The elevator's coming up and I'll keep it when it's here."

Lawrence told him to do so. The lift had stopped before doors on their ascent, and the electric light inside it had gone out, while the boy said something about his not being able to get it. Lawrence looked at the photographs, however, were not on the bureau and Lawrence searched the room before he found the light called back. Then he turned off the light and went into the passage, which was rather dark. The lamp at the shaft was not burning, but could see Walters beckoning at the gate.

"He wants to get down before the motor stops," Walters said.

Lawrence hurried along the passage, and when he reached the shaft Walters put his hand on the folding ironwork.

"Come along; his light's out," he said to Lawrence, and added, as if to somebody in the lift: "Start her off. I'll shut the gate."

Lawrence stepped forward and then clutched the ironwork as his advanced foot went down into empty space. Instead of the floor of the lift, there was a dark gap beneath him, and he knew he had come very near to plunging down the shaft. He hung over it, with one foot on the edge and his hand on an iron bar, while Walters looked on with a look of horror as he braced himself for the effort to swing his body back. There was some strain upon his right arm, but he held his right knee and his other leg dangled over the shaft. His hold on the ironwork had saved him, but he must wait to regain the passage.

Next moment a hand fastened on his wrist and he thought Walters had come to his help. But the fellow was stupid; he ought to have seized his shoulder. Then the sweat ran down his face, and he knew that Walters had not come to help; he meant to throw him down the shaft.

(To Be Continued)

Millions to Be Spent at Dayton.

Dayton, O., — Montgomery county is going ahead this spring with the construction of bridges valued at \$1,300,000 to replace those destroyed in the flood. Another million dollars is to be spent in the development of the Wright-Dayton airplane factory center. These projects will provide employment for 1,500 men.

A Floating Electric Power Station

Used to Great Advantage During the War

One of the many British "freak" vessels produced during the war is the floating electric power station, officially known as C.D. 258. Although it was formerly a ship, it was under the control of the war office, not the admiralty, having been secured for the service of the Directorate of inland waterways and docks. Its function was to supply electric current when and where required for the miscellaneous operations of this department in connection with locks, harbors and canals used for military transport. At a distance this vessel might pass for a gunboat without guns; technically it is described as a steel barge. Amidships is a complete electric power station of 1,000 horsepower, designed so that practically any type of electrical installation can be fed from this source. Two oil tanks, each with a capacity of 20 tons and an electrically driven workshop with lathe, drilling machine, and other repair plant, complete the main part of the equipment. While this "Universal electric provider" is the direct outcome of war conditions, similar equipments are likely to be very useful in the construction of sea and river works. They are also worth considering for the permanent supply of electricity to riverside towns where owing to the nature of the sub-soil and other local conditions, an ordinary power station would be difficult of erection on a site convenient for water and fuel supply. In remote parts of the world a floating oil power electric station could probably be installed and run much more cheaply than a land station.

Edmonton Planning New Theatre

Edmonton, Alta. — A fine new picture play house is in prospect for this city. It will be at the corner of 101st street and 102nd avenue, opposite the Ramsey store, where construction operations are being planned to begin in May on a \$250,000 building for the Alberta British Cinematograph company. Edmonton capital is interested in the undertaking, and the company will be incorporated under the laws of Alberta in the course of the next two weeks. F. N. V. Smith, an experienced motion picture producer from England, is the main promoter, and associated with him are the Marquis of Queensberry and Capt. James Anderson.

A division of the Northwest Mounted Police is to be established in British Columbia, with headquarters at Grand Forks.

IN MISERY FOR YEARS

Mrs. Courtney Tells How She Was Cured By Lydia E. Pinkham's Vegetable Compound.

Oakaloosa, Iowa. — "For years I was simply in misery from a weakness and a nervous system, and I could do nothing to do any more. A friend advised me to take Lydia E. Pinkham's Vegetable Compound. I did so and it relieved me right away. I am certainly relieved, and I can now do my work for me and I know it will help me if I will give it a trial."

— Mrs. L. E. Courtney, 108 8th Ave., West, Oakaloosa, Iowa.

Why will women drag along from day to day, year in and year out, suffering such misery as did Mrs. Courtney, when such letters as this are continually being published? Every woman who suffers from displacements, irregularities, inflammation, ulceration, backache, nervousness, or who is in any way afflicted with a Change of Life should give this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound, a trial. Lydia E. Pinkham Medicine Co., Lynn, Mass. The result of its long experience is at your service.

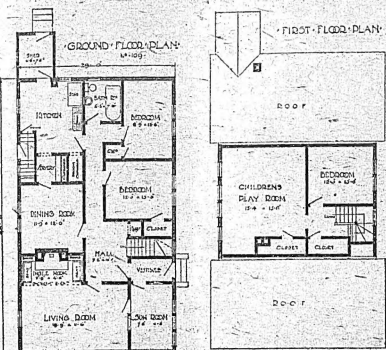

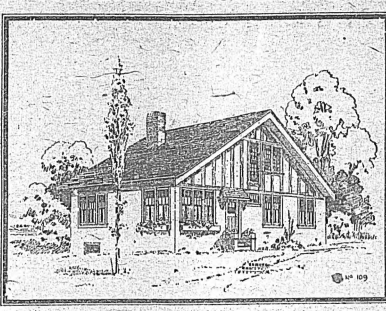

B.C. Catch of Fish Sets Record

Prince Rupert, B.C. — The February fishing business represented the largest catch for that month of any year since the industry began to be developed at this port. Halibut to the amount of 824,800 pounds passed through Prince Rupert in February, establishing a new record.

The brand of popularity that one can buy isn't worth the price.

Farm Architecture and Building

A PLEASING BUNGALOW

This bungalow is suited either for the city or country

Building Codes Result in Waste

Should Be So Made That It Can Be Revised

Probably the most tremendous waste in building construction is involuntary, and due to laws regulating building construction existing in the form of state and municipal codes, says the American Architect. Efforts must be made, the article says, to correct these involuntary wastes.

"The preparation and enactment of building codes," the article says, "is generally a slow process, being usually in the hands of commissions or committees appointed for that purpose. The personnel of these committees is often unfortunate, being dictated by political or private interests or compounded of too many honest and well-intentioned persons whose competency based on broad experience and practical knowledge is questionable."

"The code should contain only the minimum requirements that are necessary to insure that a building is structurally safe and sanitary, with adequate provision for fire prevention and safety to life. Following antiquated precedents, most codes are specifications in effect, long winded and often contradictory in their provisions. It seems ridiculous that a law should describe, in minute and verbose detail, how mortar should be mixed or shingles laid. These things are within the province of the architect's activities, and belong in his plans and specifications which are always subject to the approval of the building department."

"A code should be so made that it can be revised as fast as progress in building construction takes place. 'A city which has an improper building code is handicapped and its growth hindered by the burden of useless codes incorporated in building construction. The intelligent investor in such projects will locate in such cities that make it possible for him to secure an adequate return for his investments to which every investor is entitled. It needs no argument to substantiate the fact that the state of the building industry in any community is the index of its prosperity. If then he looks to those who have the interests of the industry at heart, architects, engineers, contractors, material producers, realtors and citizens generally, to make the proper revision of building codes now the first order of business."

Alberta's Dairy Output

Edmonton, Alta. — With a total of \$27,300,000 worth of dairy products in 1918, Alberta leads the western provinces in this branch of farm production. This is an increase of about 30 per cent. over 1917.

Log Houses of Walnut

St. Louis Lawyer Tells of Old South-west Missouri Homes

"The scarcity of black walnut and other woods used for ornamental purposes reminds me that a few years ago I visited southwest Missouri, where I found scores of old log houses, the inner walls of which were made from the finest quality of black walnut," remarked Joseph O'Hara, a St. Louis lawyer.

"Some of the oldest houses in this country are to be found in that part of Missouri, and the remarkable part about it is that all of them are so well constructed that they will continue to stand for another century. Someone recently told of a western farmer who sold a stranger a black walnut tree which was growing in his pasture for \$25, supposing he had made a good bargain. The stranger sold the same tree for \$600. This illustrates the advance in the price of walnut. Perhaps walnut has increased in value more than any other wood, unless it be mahogany."

Alberta's Dairy Output

Edmonton, Alta. — With a total of \$27,300,000 worth of dairy products in 1918, Alberta leads the western provinces in this branch of farm production. This is an increase of about 30 per cent. over 1917.

The Spring Rains Bring Grippe

This sort of weather brings colds and grippe. If it's just a common cold people say, "there's no danger in that!" But many a fatal sickness begins with a cold — with vitality weakened — the system is ready for the Influenza germs. Begin early to ward off the attack. Purge the system of the toxins (poisons) by taking castor oil, or a vegetable laxative made of Mayapple, leaves of aloe, and jalap, rolled into sugar-coated pills and to be had at all drug stores as Dr. Pierce's Pleasant Pellets.

If the cold starts with a cough, and it persists then some local treatment for this condition should be taken. A well known alternative extract which has been on the market for a great many years, and which has been highly recommended by thousands of users, is Dr. Pierce's Golden Medical Discovery. This tonic compound is composed of an extract of roots and herbs without alcohol, and has a soothing effect upon the mucous membrane, allays the irritation and at the same time works in the proper and reasonable way, at the seat of the trouble — the stagnated or poisoned blood.

The brand of popularity that one can buy isn't worth the price.

FOR THE LADIES!

We have just received an express shipment of
Beautiful Silk Waists
These are in the very latest shades and styles and are splendid values.
These waists come in the following shades—Pink, sand, coral, maize, black, ivory, grey, covert, rose. We will be glad to show these and have you make your selection while the range is most complete.

CORSETS—Also arrived a shipment of the well known D. and A. Corsets. These range in price from \$1.50 to \$4.50 per pair. These are the latest and include both the front and back lace style.

BRASSIERES—These are also made by the Dominion Corset Company, and range from 60c to \$1.15.

Please note that we have our new prints, house dresses, hosiery, and many other new spring goods in stock. Your inspection is invited.

Chinook Breezes

Tuesday, April 1st. Remember!

The local bonspiel that was advertised to take place this week has been postponed.

R. C. service in the school, on Sunday, March 30th. Mass at 10.30 a.m. Rev. Father Bowlen.

Mrs. Tom Sandman and her mother, Mrs. R. Johnston, were Calgary visitors last week.

Mr. Chapman was at Saskatoon on business for a few days, returning home on Wednesday.

Mr. and Mrs. Finlay McKenzie and baby were guests at Mr. and Mrs. R. W. Wright's home on Sunday.

Mr. Lorne Proudfoot left on Monday morning to attend the U.F.A. convention at Medicine Hat.

Inquiries for land around this neighborhood have already begun to come in. A number of buyers are being attracted this way.

During the past week, blizzards of snow have given the impression of a heavy snow storm following, but has not yet materialised.

Mrs. Clarke, accompanied by Mr. J. R. Miller, went to Calgary on Tuesday. Mrs. Clarke will undergo an operation on her eyes, as her eyesight has been greatly failing of late.

The Social Circle, which was to have been held on March 28, at the home of Mr. and Mrs. Neil McLean, has been postponed, owing to sickness in Mr. McLean's household.

At the first meeting of the new municipal insurance board, which met at Calgary last week, Mr. R. Gardiner, reeve of M.D. Golden Centre, had the honor of being elected its first chairman.

Mr. C. O. Gilmore, representing the Canadian Northern T. Properties Co., was in town for a few days this week, looking after townsite property, and adjusting some arrears of taxes owing the village on some of the lots.

Another Dept. of Extension library has been sent to Chinook. The library has been located at the parsonage. The loan of books free can be had at any time, by calling at the parsonage where a catalogue of the books may be seen.

Mr. Jas Pettigrew, a returned veteran and late on the staff of the Calgary Canadian, residing in Calgary, was in town the latter part of last week. Mr. Pettigrew had been informed in Calgary that the secretaryship of the M. D. of Collinholme was vacant, and he was looking after the position. But, we understand, he had been misinformed as the present secretary had been re-engaged.

At Calgary, before L. F. Clarry K.C., master in chambers, on Tuesday, March 25: Cottage vs. Hillery—J. P. Johnson applied for vesting and foreclosure order after abortive sale; order made, not to be taken out for a week; all parties, to be notified in the meantime.

AUCTION SALES

Anyone giving information which will enable me to recover the above described mare will receive reward. Address

HOMER NELSON,
Cereal, Alta.

Reconstruction and the Farmer

Having regard to the period of reconstruction, upon which this country is now entering, appeal is made to the farmer to organize, for the protection of his own interests.

The farmer cannot afford to

**BE LED BY THE NOSE
INDEFINITELY**

His position as producer demands that he take a sane, practical and immediate step to safeguard himself and his dependants.

A meeting for the discussion of this subject will be held in the school house, Chinook, on Saturday, April 12th, at 2.30 p.m., and all farmers are earnestly urged to attend.

The ladies of the farm, being vitally affected, are also asked to co-operate, and opportunity will be given them to express their views.

M. D. of Collinholme, No. 243

NOTICE

IN the matter of the Confirmation of the Tax Enforcement Return of the Municipal District of Collinholme, No. 243.
